Zdravim, viem mi niekto pomoct?? Mam maly problem asi s ventilmy. Motor klepotal,tazko startoval a zhavil do cervena vyfukove zvody. Nastavili sa ventily, motor startuje ok, zvody su v pohode ale ventily stale klepkaju, iked potichu ale stale ich pocut (teda myslim ze su to ventily). Uz so skontroloval aj napinak rozvodovej retaze, ci nie je povoleny retaz, ale jenspravne naspanovany. Vie mi niekto povrdat co by to mohlo byt?? Alebo je to bezny prrjav motora. Kamos ma rovnaku rx 510-ka a jeho motor pradie lepsie bez klepotania.

paul44> mam za to, ze keby bola retaz vytahana, tak napinak je na doraz. Takze retazou to asi nebude.

[seo optimization company](#) A man was going to the house of some rich person. As he went along the road, he saw a box of good apples at the side of the road. He said, "I do not want to eat those apples; for the rich man will give me much food; he will give me very nice food to eat." Then he took the apples and threw them away into the dust. He went on and came to a river. The river had become very big; so he could not go over it. He waited for some time; then he said, "I cannot go to the rich man's house today, for I cannot get over the river." He began to go home. He had eaten no food that day. He began to want food. He came to the apples, and he was glad to take them out of the dust and eat them.
